

# PV POWER

Newsletter of the IEA Photovoltaic Power Systems Programme

**AUGUST  
2008**

*Contents*

- P.2 MORE THAN JUST KILOWATT HOURS
- P.2 IEA PVPS-PROGRAMME EXTENDED
- P.4 PV IN NEW RESIDENTIAL CONSTRUCTION
- P.4 CRUNCHING THE NUMBERS
- P.6 IN BRIEF
- P.7 PVPS NEWS
- P.8 FITZGERALD MEMORIAL AWARD
- P.8 HELP FROM ABOVE

*More than mere kWh: Toronto artist, Sarah Hall, has created a stunning and inspiring installation, 'Lux Nova', for the University of British Columbia's Regent College. The feature challenges viewers to explore the connection between the beauty of art and the preservation of our planet and its resources. The stained-glass tower incorporates an array of solar cells, collecting energy during the day to illuminate the park at night. The luminous column flows like a waterfall in silvery blues, violet and white, acting as a warm, glowing beacon for the community.*
